Subject Jewett White Lead Company - - Update for 4/6/09

Cecilia and I went out to the community and distributed approximately 200 flyers in English/Spanish to the surrounding residences and businesses, the library, a few churches and at the public school. We plan to return tomorrow to extend the outreach a few more blocks (hopefully the weather will be better than today).

We have created a webpage for the Jewett site which will be updated as needed. The webpage will be operational tomorrow morning.

All activity at the site is related to the interim action.

Veteran's Park:

Results of analysis of background samples collected from Veteran's Park were provided to and discussed with New York City Department of Parks and New York City Department of Health and Mental Hygiene.

Will keep you informed as things progress.
